RE: Executive Order on Ensuring Adequate COVID Safety Protocols for Federal Contractors

Dear Members of the Safer Federal Workforce Task Force and FAR Council

As the Safer Federal Workforce Task (Track Force) draftsuidancon and the Federal Acquisition Regulations Council (FAR Council) writes regulationsplement the xecutive Order on Ensutinguate COVID Safety Protocols for Federal C(Cottaer) the Associated General Contractors of AmeAiCaC) respectfully puts for the construction industry's deep concerns with and sensible recommendations for carrying outhisOrder.

For background, GC is the leading association in the construction industry representing more than 27,000 firms, including America's leading union and **spep**general contractors and speciality tracting firms. Many of the nation's service providers and suppliers are associated with AGC through a nationwide network of chapters. AGC contractors are engaged in the construction of the nation's abbuildings, shopping centers, factories, warehouses, highways, bridges, tunnels, airports, waterworks facilities, waste treatment facilities, levees, locks, dams, water conservation projects, defense facilities facilities projects, and more.

Since the onset of the pandemic, AGC and its members have strived to ensure the safety and health of the greatest construction industry asset: its morselvan million employees. COVID-19 vaccines became available, AGC provided resources to its breen about the vaccines, their safety their effectiveness. In addition, the association created an industry

AGC wants to underscore that the senario and risk is very real and could lead to serious consequences for federal construction contractors to meet contractual obligation deliver projects that help ensure our national security and federal governmental functions. It must be added that poisarisk to be without any thought towards mitigating its impact in any reasonable way, placing all the risk on the federal contractor. Below, AGC recommends some act the sTask Force and FAR Courcain take to sensibly mitigate these risks again, assuming the Order with stands legal challenge.

- II. The Task Force and FAR Council Should Mitigate the Unintended Consequences of the Vaccine Mandate on Federal Construction Contractors and their Capacity Bouild the Nation's Defense and Civil Infrastructure
 - a. <u>Define 'Workplace bcation's Based on the Federal Construction Industry</u> <u>and Health and Lowisk Transmission Status throughout the Pan</u>demic

The construction industry is the delivery tool for building and maintaining critical infrastructure and facilities used to deliver clean water and electricity, protectational security, and transport essential goods and services like medical supplies, grocerie mast drecently COVID-19 vaccine Equally important, the construction industry has a long history of worksing sure the safety and health of their employeees before the COVID19 pandemic Given the many precautions already in placeonstruction jobsites are uniqueness of construction projected their environment—which is completely different an office workplace-AGC holds that applying the vaccination mandate universally all types construction does not make sense.

Most construction operations are low risk with respect to the transmission and spread of COVID19. Early in the pandemic, OSHA explained that the level of risk of occupational exposure to COVED19. Early in part on the industry type, need for contact within 6 feet of people known to be, or suspected of being, infected with SARGoV-2, or requirement for repeaterdextended contact with persons known to be, or suspected of being, infected with SARGoV-2, or requirement for repeaterdextended contact with persons known to be, or suspected of being, infected with SARGoV-2, or requirement for repeaterdextended contact with persons known to be, or suspected of being, infected with SARGOV-2, or requirement for repeaterdextended contact with persons known to be, or suspected of being, infected with SARGOV-2, or requirement for repeaterdextended contact with persons known to be, or suspected of being, infected with SARGOV-2, or requirement for repeaterdextended contact with persons known to be, or suspected of being, infected with SARGOV-2, or requirement for repeaterdextended contact with persons known to be, or suspected of being, infected with SARGOV-2, or requirement for repeaterdextended contact with persons known to be, or suspected of being, infected with SARGOV-2, or requirement for repeaterdextended contact with persons known to be, or suspected of being, infected with SARGOV-2, or requirement for repeaterdextended contact with persons known to be, or suspected by people such as other workers, customers, osuspected by having or known to have COVID-19, including when an occupant of the site reports signy aptions consistent with COVID-19. Therefore, construction work is unlikely ever to postendes the provide of the site reports of the site reports of the site reports and the persons approaches the persons that the persons are constructed of the site reports of the persons and the persons are consistent with COVID-19. Therefore, construction work is unlikely ever to postendes the person of the persons are constructed of
